

DC AirCube 1200

The DC AirCube 1200 is a highly efficient and robust air cleaner with the ability to clean the air even in large rooms, at a rate of up to 1.060 m³/h.

The encapsulated fan housing contains a radial blower type fan that builds up high pressure across its entire flow range, which provides effective air cleaning for the entire lifetime of the filter. The speed of the fan is also continuously variable in order to save energy.

The DC AirCube 1200 is equipped with both a HEPA H13 filter that captures the smallest particles and a light that indicates when it is time to replace the filter.

Specification

H x W x L	86x43x55 cm
Weight	23 kg
Inlet/outlet diameter	25 /31.5 cm
Power consumption	
230 V	385 W
115 V	375 W
Flow at open inlet, max*	1660 m ³ /h
230 V	1660 m ³ /h
Pre-filter area **	0.5 m ²
HEPA filter area	5 m ²
Filter class	H13
Sound level	60-68 db (A)
