HAWK C-SERIES ANAMORPHICS

For you it's an art, for us it's a science.

Hawk C-Series Anamorphics established Vantage's reputation for lenses with top-notch consistency and durability. The very first lens line produced by Vantage Film almost 25 years ago, the C-Series glass offers timeless beauty and simplicity.

C-Series lenses deliver thoroughly modern and sharp imagery that is also slightly forgiving, with a very natural feel. Designed with an understanding of how filmmakers work, the C-Series family includes a 60 mm/T2.2 lens – a very useful focal length in the 2x format that had usually been left out in previous anamorphic lens sets. Because of their popularity, Vantage continues to produce parts and maintain the C-Series line.

Hawk C-Series Lenses are the first generation of Anamorphics developed and manufactured by Vantage.
