

# Hive Work Zones

## Cleaned Air Working Environments

Inflatable, cost effective & easily re-locatable self-contained workspace with the concept of minimising the spread of respirable dust produced from cutting processes throughout construction projects.

---

### Dimensions:

3m wide x 3m deep x 2.2m high

### Weight:

34kg when packed in bag

---

## Key Features:

### Clean Air

Hive Work Zones have been developed to enable the recirculation of filtered clean air, with outlet / inlet ports incorporated in various areas of the Hive Work Zone. Thus, helping to reduce the incidences of construction related lung conditions.

### Modular

The Hive Work Zone has the major advantage of being easily extendable with the easy connection of additional Hive Work Zone units.

### Versatile

Hive Work Zones stop the migration of dust leaving the tent, as well as preventing dust outside from entering – making it ideal for use as a site welfare unit or offices.

### Ease of use

The Hive Work Zone is supplied with an external inflation pump and the structure inflates full in approximately 3 minutes.
