

## FR48 PORTABLE EVAPORATIVE COOLER

**The FR48 is a powerful evaporative cooler perfect for use indoor and semi-outdoor areas up to 57 m<sup>2</sup>. The FR48 provides up to 1,800 m<sup>3</sup>/h of airflow and houses a 48 litre water tank.**

The FR48 is a powerful evaporative cooler and is the perfect choice for keeping indoor or semi-outdoor environments comfortably cool and breezy.

Its powerful motor helps to deliver strong airflow while a 14" (36 cm) fan blade and 3-side honeycomb media keep performance optimal.

A continuous water supply connection, 48 litre water tank and built-in water overflow protection system allow long periods of unattended operation, making it perfect for more demanding residential or commercial applications.

Ideal for; garage/workshops, barbecue areas, garden patios, cafes/bars, restaurants, shops, shopping malls, airport lounges, hotel lobbies, party halls, marquees, waiting areas, gyms, cinemas, warehouses and factories.

### Features

- 1,800 m<sup>3</sup>/h air volume capacity
- 48 litre water tank capacity
- 3 Fan speeds
- Carbon Dust filter
- Honeycomb cooling pads
- Cools up to 57 m<sup>2</sup>

### Technical Data

Max Airflow Volume	1,800 m <sup>3</sup> /h
Water Tank Capacity	48 litres
Manual Water Drain System	Yes
Timer	No
Input Power	140 W
Voltage Rating	230 V
Fan Speeds	3
Frequency	50 Hz
Cooling Pads	Honeycomb
Filter Type	Carbon Dust
Remote Control	No
Manual Control Panel	Yes
Oscillating Louvres	Yes
Fitted Castors	Yes
Main Unit Dimensions w x h x d	62 x 86.8 x 37.5 cm
Unit Weight	16 kg
