

FR60 PORTABLE EVAPORATIVE COOLER

The FR60 is a weather resistant and water-proof evaporative cooler ideal for use in large indoor or outdoor environments. The FR60 provides up to 2,610 m³/h of airflow and cools up to 80 m².

The FR60 is weather resistant and water-proof evaporative cooler that is made to resist outdoor conditions such as heavy rain or continuous strong sunshine. It is the perfect choice to keep large indoor and outdoor environments comfortably cool and breezy.

Its capable motor helps to deliver a high airflow level and the 40 cm fan blade along with triple honeycomb media keeps performance optimal.

A continuous water supply connection, massive 60 litre water tank, and built-in overflow protection system allow long periods of unattended operation. It's perfect for the more demanding and commercial type applications.

Ideal for applications such as; garages, barbecue areas, show rooms, cafe/bars, restaurants, shops, shopping malls, airport lounges, hotel lobbies, party halls, marquees, gymnasiums, cinemas, warehouses and factories.

Features

- 2,610 m³/h air volume capacity
- 60 litre water tank capacity
- 3 Fan speeds
- Carbon Dust filter
- Honeycomb cooling pads
- Cools up to 80 m²

Technical Data

Max Airflow Volume	2,610 m ³ /h
Water Tank Capacity	60 litres
Water Tank Entry	Yes
Manual Water Drain System	Yes
Timer	No
Input Power	220 W
Voltage Rating	230 V
Fan Speeds	3
Frequency	50 Hz
Cooling Pads	Honeycomb
Filter Type	Carbon Dust
Remote Control	No
Manual Control Panel	Yes
Oscillating Louvres	Yes
Fitted Castors	Yes
Main Unit Dimensions w x h x d	46.6 x 101.7 x 70 cm
Unit Weight	22 kg
