

INTRODUCING THE SHINDAIWA ECO HYBRID WELDER GENERATOR

The Shindaiwa 300amp Eco Hybrid Welder Generator sets the standard for more sustainable welding solutions. Delivering substantial savings on carbon emissions and fuel, helping you to reduce your running costs, whilst reducing your impact on the environment.

The Kubota Stage V compliant engine works in conjunction with an advanced lithium capacitor storage system to ensure the engine is always running at optimal efficiency and automatically shuts down when it is not in use.

300amp Eco Hybrid Welder Generator

Up to **60%** less fuel consumption*

Up to **60%** less CO2 emissions*

Ultra quiet operation at just **55dB (A)**

Stage V compliant engine

Auto stop/start

Leave the **how** to us.
