

072/367 – 10T Tesmec Tracked Winch (Diesel)

Our Winches are fully automatic, easy to use, reliable and simple to maintain. Built with the user in mind, they offer 'hands-free' operation. The operator simply sets the required tonnage and line speed and the Winch takes the strain. For swage lining and sensitive cable winching operations, an optional data logger can be fitted to the Winch to constantly monitor the line speed and winching force used. This then stores and prints a hard copy of the statistics for reference purposes.

10T Tesmec ARS610 Diesel Cable Winch (072/367 – Caterpillar Tracks – for underground use only)

- Pulling force: 100 kN
- Pulling speed at 100kN: 17 m/min
- Pulling speed max.: 35 m/min
- Pulling-out speed: 83 m/min
- Rope diameter: 16 mm
- Rope length: Up to 1500 mtr
- Colour Touch Screen Electronic data recorder/printer
- Single speed caterpillar track system with radio remote control
- 2 batteries and on board battery charger
- Cable remote control for winch operation
- Length: 3210 mm
- Width: 2250 mm
- Height: 1965 mm
- Weight: 5510 Kg
