MANHOLE COVER LIFTER

Special Offer - Limited Stock Available

The unit is designed to allow a single person to safely remove and replace a variety of manhole, duct and trench covers. The pivoting bearer beam allows the lid to remain horizontal during the removal and replacement process. The wheels are 260mm diameter with pneumatic tyres allowing the device to travel across a gravelled surface. The device will fold into a compact unit making it easy to store and transport.

- S.W.L 125kg
- Lightweight unit only 33kg
- Comes complete with a test certificate
- Available with extending bar and other accessories
- Tool box comes with 25mm & 35mm heavy duty T bar keys, hooks for lifting gully pins & L shaped keys for internal manhole lids, BT lids with small oval holes
